

Hp-QC - Server Side Configurations

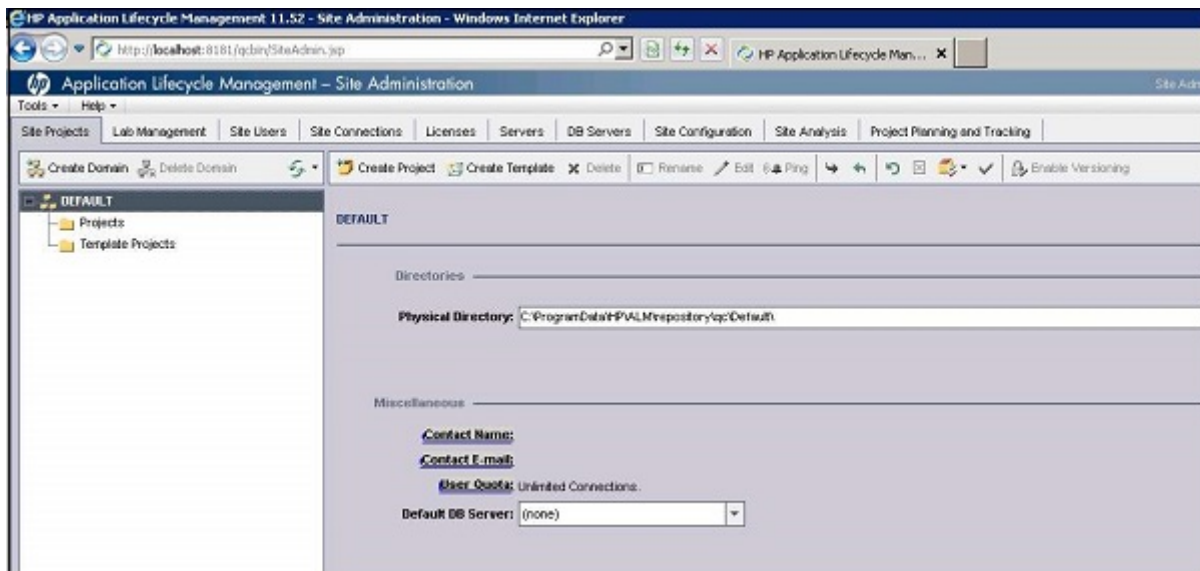

Once the HP-ALM is installed, we can continue to work with ALM only after creating domain, project, and users. In this chapter, we will discuss how to create Project, Domain and Users.

Creating Domain

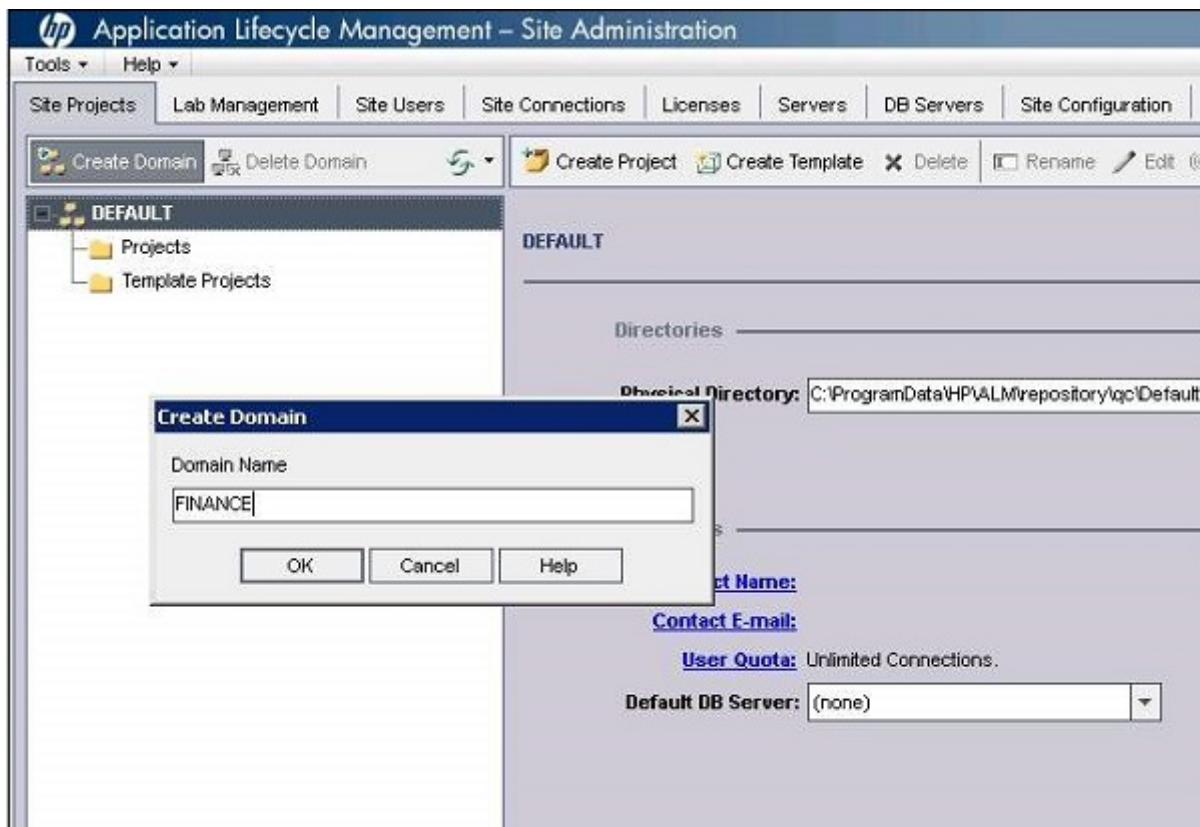

Step 1 – For creating a Domain, the first step is to get into Site Administrator Page. Launch QC using the URL - **`http://localhost:8181/qcbin/SiteAdmin.jsp`** and enter the Admin credentials that was set up while installing QC.

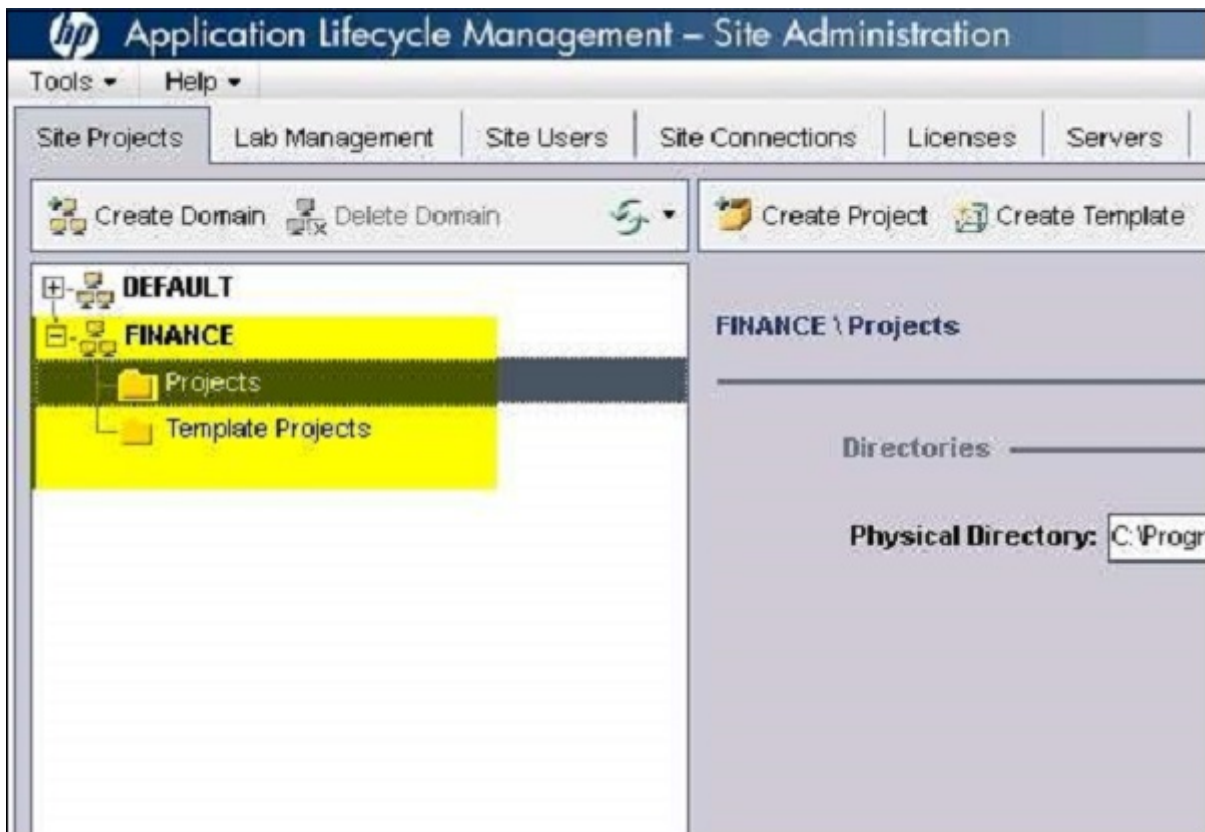

Step 2 – After logging into Site Admin page, we will land in Site Projects Tab as shown below. The next step from there is to create a Domain.

Step 3 – Click the 'Create Domain' button on the top-left corner. Enter Domain Name and click OK.

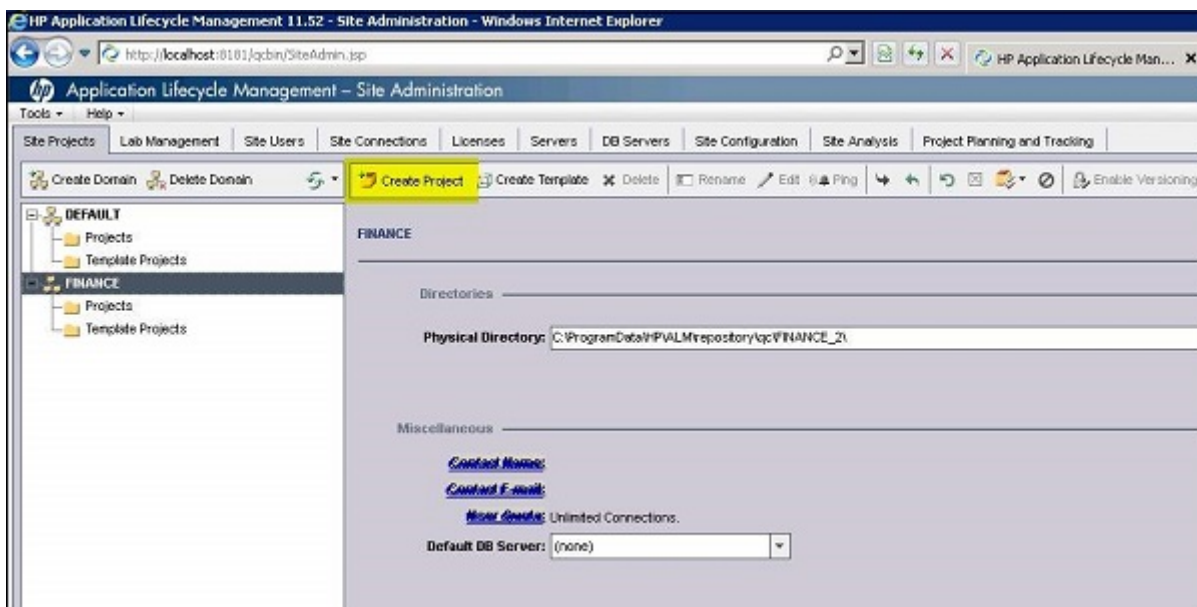

Step 4 – Domain would be created as shown below.

Creating Projects

Once a Domain is created, the next step is to create 'Projects'. Creating a Project takes us through a wizard and one should follow the steps given below to create 'Projects'

Step 1 – Select the Domain under which the project needs to be created and then click the "Create Projects" button as shown below.

Step 2 – The Create Project Wizard opens. Select "Create an Empty Project" and click "Next".

Create Project

Select to create a new project

- ☒ Create an empty project
- ☐ Create a project from a template
- ☐ Create a project by copying data from an existing project
- ☐ Create a project by importing data from an exported project file

Step 4 – Enter the Database credentials and click "NEXT".

The 'Create Project' dialog box is shown. It has a title bar with a close button. The main area contains the following fields and controls:

- Database Type:** A radio button group with 'Oracle' and 'MS-SQL'. 'MS-SQL' is selected.
- DB Server:** A text field.
- Server Name:** A dropdown menu showing 'YDH-STWTF2K8-B02'.
- DB Admin User:** A text field containing 'sa'.
- DB Admin Password:** A text field with masked characters '*****'.
- Create as Unicode:** An unchecked checkbox.
- Buttons:** 'Back' (with a left arrow), 'Next' (with a right arrow), 'Cancel', and 'Help'.

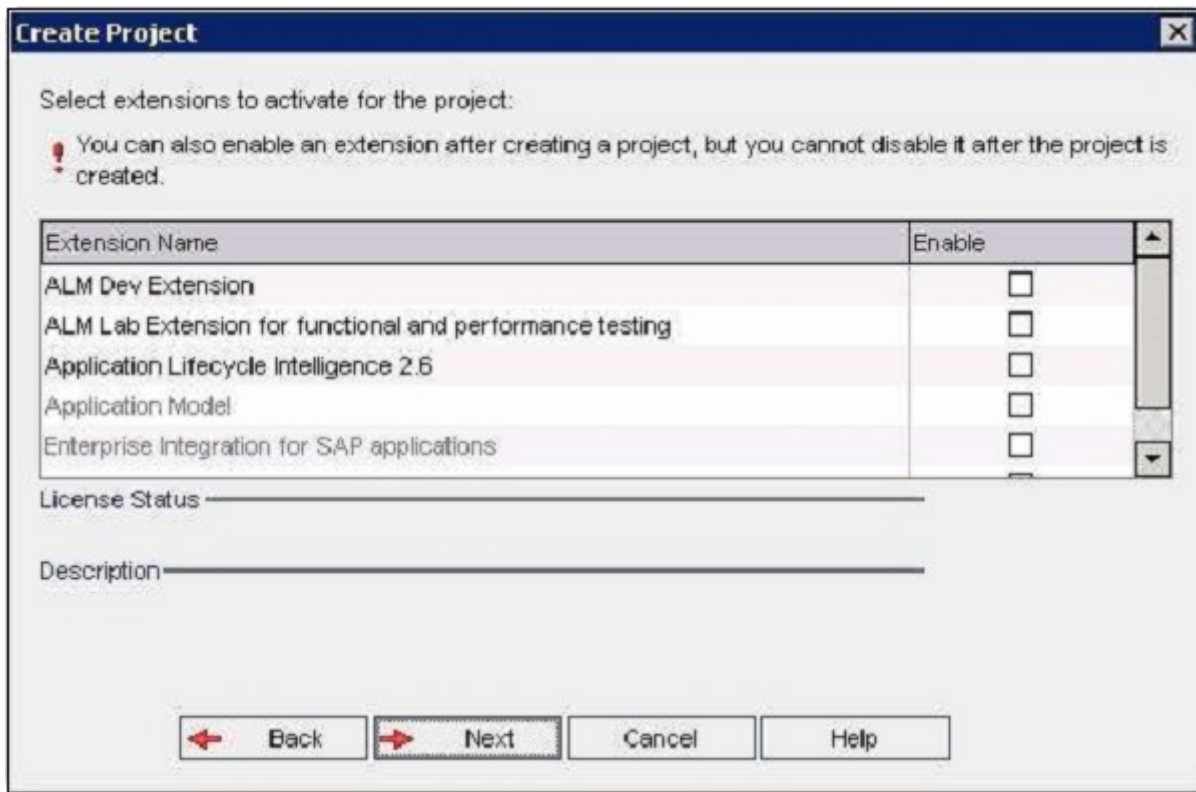

Step 5 – Select the Project Administrator user ID and click "NEXT".

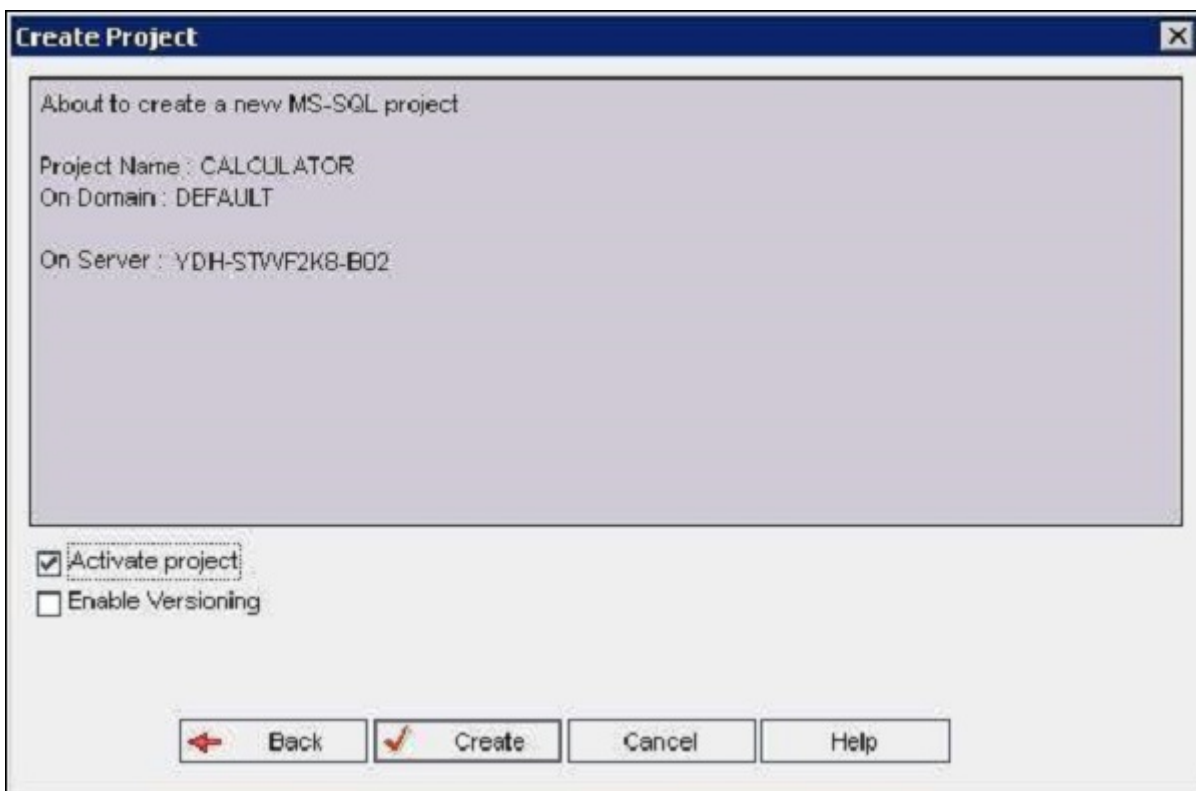

The 'Create Project' dialog box is shown at the 'Add Project Administrators' step. It has a title bar with a close button. The main area contains the following fields and controls:

- Add Project Administrators:** A section header.
- Selected Project Administrators:** A list box containing 'Administrator'.
- Available Users:** A section with a search bar (containing 'Find') and a list box. The list box has a header with 'User Name' and 'Full Name'.
- Note:** A text box stating 'Note: You can also assign Project Administrators after creating a project.'
- Buttons:** 'Back' (with a left arrow), 'Next' (with a right arrow), 'Cancel', and 'Help'.

Step 6 – Select the extensions to activate the project and click "NEXT".

Step 7 – Check the Activate checkbox and enable Version controlling (if you want) and click "NEXT".

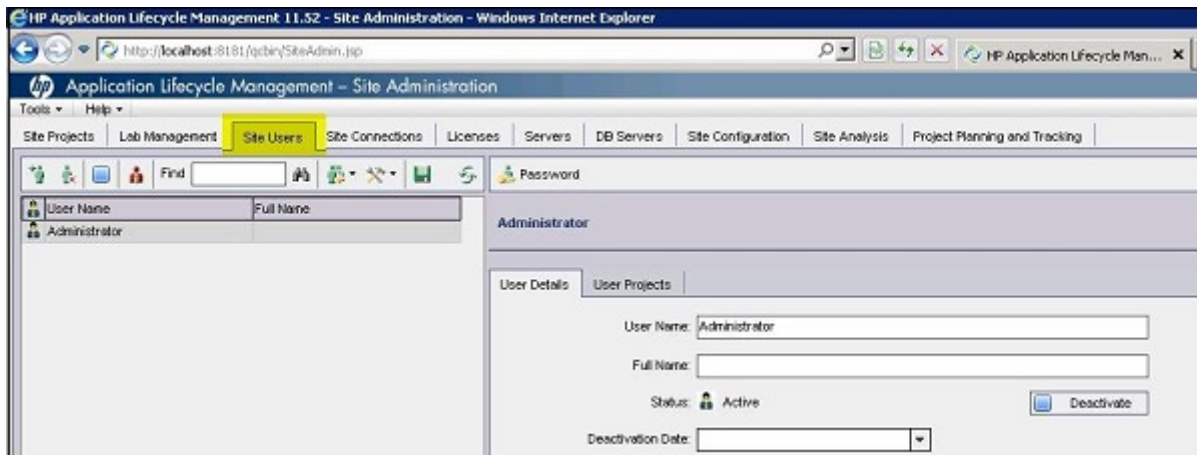

Step 8 – Upon clicking "Next", the project "Calculator" is created successfully. Click "OK" to see the created project in the Project Pane.

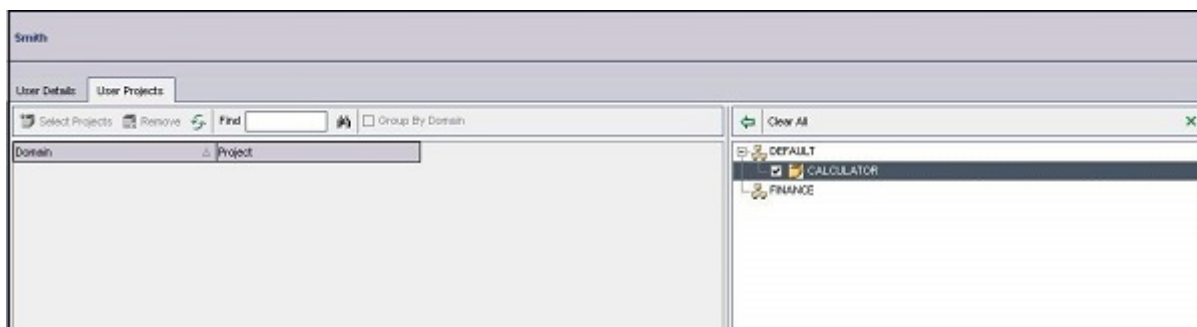

Creating Users

Step 1 – Select the Site Users Tab in "Site Admin" Page as shown below and click the "Add New User" button.

Step 2 – The New User window opens up. Fill the user details and click "OK".

Step 3 – After Creating the user, give the user the project access that they need.

Step 4 – Verify the user list in "Project Users" Tab after giving the user the access to the project.
